Education

B.M.S. College of Engineering (BMSCE), Bengaluru, India
B.E. in Computer Science and Engineering

2022 – 2026
CGPA: 9.57/10

Experience

Oracle — Associate Software Developer Intern, Retail Insights Team

Jan 2026 – Jul 2026

- Designed and developed deployment automation scripts using Oracle’s internal deployment tooling and Bash scripting, enabling parallel deployments and reducing overall pipeline execution time by approximately 70–80 minutes.
- Developed an AI-powered troubleshooting assistant by integrating Jenkins job metadata and Confluence knowledge through an MCP-based architecture, supporting 10 Jenkins jobs and 30+ documented failure scenarios for rapid root-cause analysis.
- Owned the daily Jenkins build and deployment pipeline for the Retail Insights platform, monitoring execution, investigating failures, and coordinating with development, QA, deployment, and infrastructure teams to maintain build stability and release readiness.
- Diagnosed and resolved build, deployment, and batch-processing issues across Jenkins, Kubernetes environments, and internal orchestration systems, collaborating with cross-functional teams globally to ensure successful daily builds and QA deliveries.

Netradyne — SDET Intern, Data Science QA Team

May 2025 – Jul 2025

- Developed automated data validation scripts in Python (Pytest) to verify Chat Assistant API responses, reducing validation time per query to under 60 seconds.
- Designed and documented a reusable test framework with GitHub integration, enabling consistent execution and faster onboarding for QA engineers.
- Collaborated with developers to refine validation logic, obtain API specifications, and align testing with real-world customer scenarios.

Skills

Languages: Python, Java, JavaScript, SQL	Backend: Node.js, Express.js, REST APIs
Frontend: React, Tailwind CSS	Databases: MySQL, MongoDB
DevOps: Docker, Jenkins, Bash	AI/LLM: MCP, LLM Applications
Tools: Git, GitHub, Postman, Jira	Concepts: Authentication, CI/CD

Projects

DSA Games — Full-Stack Gamified Learning Platform

[GitHub](#) — [Live Demo](#)

React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Docker

- Built and deployed a full-stack DSA learning platform featuring interactive games, leaderboards, achievements, XP tracking, and progress dashboards, attracting 400+ visits and generating 780+ user interactions.
- Implemented secure authentication with access tokens, rotating refresh tokens, password hashing, protected routes, and server-validated scoring to reduce client-side score manipulation.
- Designed a MongoDB-backed backend and containerized the application using Docker and Docker Compose, deploying services on Vercel, Render, and MongoDB Atlas.

AI-Powered Jenkins Pipeline Triage Assistant

Python, MCP, Jenkins REST API, Confluence REST API

- Built an AI-powered DevOps assistant that integrates Jenkins pipeline data and Confluence runbooks through a custom MCP server, enabling natural-language troubleshooting of CI/CD failures.
- Implemented log analysis and failure-signature extraction across 10 Jenkins jobs and 30+ documented failure scenarios, automatically retrieving and ranking relevant operational documentation.
- Designed enterprise safety controls including read-only API enforcement, source traceability, confidence scoring, stale-document detection, and escalation guidance for production support workflows.

Achievements

- Secured State Rank 6 in the Karnataka SSLC Board Examination.
- Built and managed a digital art portfolio on Pinterest, generating 70K+ impressions and 1.7K+ engagements across original artwork.
